Health System
Newton Medical Center

Project SEARCH is a one-year, business-led, unpaid internship program for students with disabilities in their last year of high school that takes place entirely at a host business site. It provides students who want to work a chance to explore careers and develop transferable job skills. The combination of instruction and immersion in the workplace prepares young adults with disabilities to make successful transitions from school to productive adult life.

The goal for each participant is community employment!

Wound Center

Materials Management

Food Services

Transport Services

How Project SEARCH Works:

- Report directly to Newton Medical Center for a 10 month, 20 hours per week, internship program
- Daily soft skills class room instruction combined with hands on internship experience
- Supports provided by certified employment specialist and credentialed special education teacher
- Explore careers with employment outcomes
- Receive extensive travel training and long term supports
- Receive natural supports from hospital employees
- and so much more!
